Title: An Introduction to Orofacial Myofunctional Disorders

Course Description: This is an introduction to Orofacial Myofunctional Disorders and the effects they can have on breathing, swallowing and speech. As speech language pathologists we are uniquely qualified to work with these clients in all of the areas they may have deficits.

Learning Objectives:

1. After completing this activity, participants will be able to define orofacial myofunctional disorders (OMDs).
2. After completing this activity, participants will be able to describe the effect OMDs have on growth and development.
3. After completing this activity, participants will be able to identify indicators of an OMD.

Presenter: STACIE CARLSON, M.A., CCC-SLP

Biography: I am a SLP, clinical instructor and clinical director at the USD Scottish Rite Children's Clinic in Sioux Falls. I have years of experience working with children in various settings. I have a particular interest in Speech Sound Disorders. That interest lead me to investigate OMDs and their impact on speech and swallowing. I live in Tea, SD with my husband Kev, sons Jack, and Taye. When I'm not at work I love to be at the lake!

Disclosures:

Financial: University of South Dakota: Salary

SDSLHA: registration waived

Non-Financial: Stacie Carlson reports no relevant non-financial disclosures.
